

09 JANUARY 2023 #DigitalEU

A successful digital transformation in Europe by 2030 needs structured and close cooperation between the EU and Member States in order to boost European digital capacities and capabilities around four cardinal points:

The Digital Decade policy programme sets clear targets & objectives for Europe's digital transformation. They will be achieved through a cooperation mechanism and a new framework for multi-country projects.

DIGITAL SKILLS

Adults with basic digital skills

NOW TARGET **Employed ICT specialists & gender balance**

8.9 million NOW M 20 million **TARGET**

DIGITAL INFRASTRUCTURES

Gigabit network coverage

70% NOW TARGET

High-speed mobile coverage (at least 5G)

NOW **TARGET** The EU production of semiconductors, including processors, makes up

10% NOW

≥ 20% of world production in value TARGET |

Deploy ≥ 10,000 edge nodes By 2025, the first

EU computer with quantum in the EU for fast data access and processing acceleration

DIGITAL TRANSFORMATION OF BUSINESSES

BUSINESSES USING ONE OR MORE

NOW

Cloud computing services

TARGET _______ 75%

Big data

Artificial Intelligence

SMEs with at least a basic level of digital intensity

NOW

TARGET -

There are

NOW

the number of unicorn

startups in Europe

DIGITALISATION OF PUBLIC SERVICES

Online access to key public services (related to career, studying, family, regular business operations, moving)

NOW

75/100 citizens

82/100 businesses

Everyone has access to eID, electronic health records & online public services

Multi-country projects are large scale projects designed to facilitate the achievement of the targets for the digital transformation of the Union, and for industrial recovery. They will pool EU, national, and private resources to achieve progress in critical areas that no Member State could achieve on its own.

Multi-country projects will facilitate investments in areas like:

Blockchain

Low-power processors

Pan-European deployment of 5G corridors

Highperformance computing

Secure quantum infrastructure and network of cybersecurity centres

Digital public administration

Digital innovation hubs

High-tech partnerships for digital skills

As well as other projects that are deemed necessary to help achieve the objectives of the Path to the Digital Decade due to changing social, economic, or environmental developments.

Main steps in the creation of multi-country projects:

Definition of an initial **list of projects** and its regular updating to account for developments and gaps in Europe's digital transformation.

Establishment of a **cooperation and coordination mechanism** to identify participating Member States, funding sources, and appropriate implementation instruments.

Introduction of **the European Digital Infrastructure Consortium (EDIC)**, a new instrument proposed by the European Commission to help speed up and simplify the setup and implementation of multi-country projects, where other existing legal frameworks may not be appropriate, e.g. European blockchain service infrastructure. EDIC will allow implementing multi-country projects in a swift and flexible manner, while remaining open to all interested Member States.
