

# European Water Resilience Strategy

June 2025

The European Water Resilience Strategy paves the way for a water-smart Europe for people, the economy and our ecosystems.

It contains concrete actions up to 2030 to make Europe water resilient.

Water is a finite resource. 34% of the EU is affected by water scarcity.

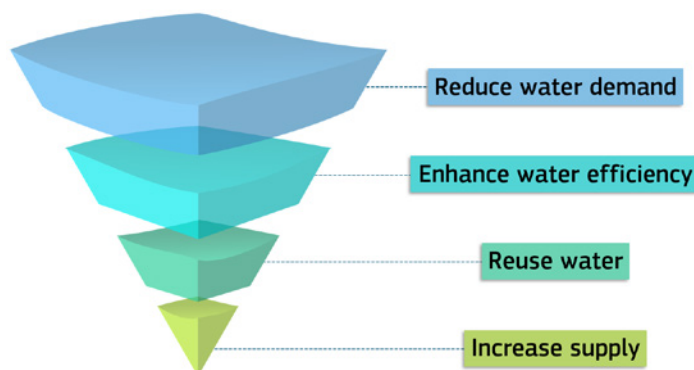

## The European Water Resilience Strategy aims to:

Restore  
and protect  
the water cycle

Build a  
water-smart economy  
to boost competitiveness  
and attract investments

Clean and affordable  
water and sanitation  
for all

## Water efficiency first principle

Improve awareness,  
governance and  
implementation through  
dialogues with Member  
States and public  
debate

Secure investments and  
modernising infrastructure  
with increased EU financing  
for water resilience and  
greater cooperation with the  
European Investment Bank

Enhance security and  
preparedness by  
reducing disaster risk  
and improving  
recovery

**Concrete actions  
to support Member  
States and all sectors to  
become water-resilient**

Support digitalisation by  
using satellite data and  
Copernicus

Boost innovation and  
skills for a more  
competitive water  
sector
