

**Opinion of the Romanian Chamber of Deputies on the
Communication from the Commission to the European Parliament, Council,
European Economic and Social Committee and the Committee of the Regions**

**Stepping up Europe's 2030 climate ambition – Investing in a climate-neutral
future for the benefit of our people**

COM(2020) 562

The Chamber of Deputies supports the ambitious climate objectives presented for Europe, with a view to 2030, as well as the strategy to invest in a climate-neutral future in the interest of citizens, set in response to the climate crisis and to combat the effects of global warming.

It also expresses concern at the increasing risks and consequences of climate change by natural and human disasters and urges the use of new technologies, such as blockchain and artificial intelligence to ensure the integrated management at Union level of these processes and events with significant negative impact on citizens' health and well-being.

The Chamber of Deputies is interested in the identification and implementation of more cost-effective economic and social solutions, with the aim of making the transition towards climate neutrality taking into account the specific circumstances of each Member State and respecting the agreed energy mixes.
