## Foreword

In May 2011 the High Representative of the Union for Foreign Affairs and Security Policy and the European Commission put forward a new policy response to a changing EU neighbourhood<sup>1</sup>.

The renewed neighbourhood policy put additional emphasis on shared commitment to the universal values of human rights, democracy and the rule of law and involving a much higher level of differentiation. It also introduces the concept of **“deep and sustainable democracy”** encompassing the following elements: free and fair elections; freedom of association, expression and assembly and a free press and media; the rule of law administered by an independent judiciary and right to a fair trial; fighting against corruption; security and law enforcement sector reform (including the police) and the establishment of democratic control over armed and security forces.

This year Country Progress Reports reflect the new approach and pay additional attention to progress towards deep and sustainable democracy and the respect of human rights in general. They are accompanied, for the first time by a Statistical Annex which builds and expand on the basic statistical information provided until 2011 in the Annex to the Sector Report and complements the narrative information included in the Country Progress reports.

Besides the “classical” economic, trade and social data, this Annex also collates information and indicators related to advancements in deep and sustainable democracy and in the respect of human rights. Such information and indicators come from a variety of sources, notably: the Freedom House, Transparency International, the Economist Intelligence Unit, the World Bank, Ilga International. A close cooperation with civil societies and NGOs has brought to include indicators on freedom of the press, on the respect of LGBTI rights, on the fights against cruel and inhuman treatments and against death penalty.

The Statistical Annex also provides more detailed fact and figures on the EU assistance in a new set of Country fiches.

The present document provides, as a background to the European Neighbourhood Policy (ENP) Joint Communication, selected political, economic, mobility and assistance related indicators, statistics and graphs.

## 2. Deep Democracy Indicators

### **The World Bank Governance Indicators (2011)**

The Worldwide Governance Indicators (WGI) project reports aggregate and individual governance indicators for 213 economies in 2010, for six dimensions of governance: Voice and Accountability; Political Stability and Absence of Violence; Government Effectiveness; Regulatory Quality; Rule of Law; Control of Corruption.

The aggregate indicators combine the views of a large number of enterprise, citizen and expert survey respondents in industrial and developing countries. The individual data sources underlying the aggregate indicators are drawn from a diverse variety of survey institutes, think tanks, non-governmental organizations, and international organizations.

The six aggregate indicators are reported in percentile rank terms from 0 to 100, with higher values corresponding to better outcomes.

## Economist Intelligence Unit's Democracy Index (2011)

The fourth edition of the Economist Intelligence Unit's Democracy index provides a snapshot of the state of democracy worldwide, as of the beginning of December 2011, for 165 independent states and two territories. The overall Democracy index, on a 0 to 10 scale, is based on five categories: electoral process and pluralism; civil liberties; the functioning of government; political participation; and political culture.

The index values are used to place countries within one of four types of regimes:

1. Full democracies--scores of 8-10
2. Flawed democracies--score of 6 to 7.9
3. Hybrid regimes--scores of 4 to 5.9
- 4 Authoritarian regimes--scores below 4

## Transparency International Corruption Perception Index (2011)

The Corruption Perceptions Index ranks countries/territories based on how corrupt their public sector is perceived to be. A country/territory's score indicates the perceived level of public sector corruption on a scale of 0 - 10, where 0 means that a country is perceived as highly corrupt and 10 means that a country is perceived as very clean. A country's rank indicates its position relative to the other countries/territories included in the index.

### World Bank's "Doing Business" Ranking (2012)

Economies are ranked on their ease of doing business, from 1 – 183. A high ranking on the ease of doing business index means the regulatory environment is more conducive to the starting and operation of a local firm. This index averages the country's percentile rankings on 10 topics, made up of a variety of indicators, giving equal weight to each topic. The rankings for all economies are benchmarked to June 2011.

## Ratification of core labour standards (2011)

The core labour standards are fundamental principles that protect basic human rights in the workforce. As stated in the ILO Declaration on Fundamental Principles and Rights at Work (1998) the core labour standards aim to: (1) eliminate all forms of forced or compulsory labour; (2) effectively abolish child labour; (3) eliminate discrimination in respect of employment and occupation; and (4) ensure the freedom of association and the right to collective bargaining.

## 4. European Integration Index for Eastern Partnership Countries – Open Societies Foundations / Renaissance foundation

The Index measures the situation in EaP countries in June 2011. European integration is assessed through three dimensions:

1. **Linkage:** growing political, economic and social ties between each of the six EaP countries and the EU;
2. **Approximation:** structures and institutions in EaP countries converging towards EU standards and in line with EU requirements;
3. **Management:** evolving management structures for European integration in EaP countries.

These dimensions are subdivided into the **SECTIONS**, *Categories* and *Subcategories* shown in *Table 1*

Benchmarks were defined by assigning 1 and 0 to the best and worst possible performance.

## 1) ENPI allocations

There was no NIP for the period 2007-2010 in Libya. A total of **EUR 8 million** under ENPI was earmarked for the Benghazi Action Plan (BAP) on HIV/AIDS and funds were committed as special measures. An additional **EUR 10 million** was committed in 2010 as a special measure in the field of migration.

Disbursed : overall	0.0	1.2	1.3	0.6

The NIP 2011-2013 with an overall budget of EUR 60 million was signed with the Libyan government in June 2010 including two focal areas: (i) Improving the quality of human capital; (ii) Sustainability of economic and social development. With the outbreak of the Libyan crisis in February 2011 all ongoing cooperation contracts were technically suspended and no new operation signed. A review of the focal areas and individual activities of the NIP will be undertaken with the new authorities at the appropriate moment.

In the meantime, the 2011 allocations (EUR 10 million) have been reoriented towards the most urgent needs caused by the armed conflict in the following areas and preparatory work is ongoing for 2012 and 2013 allocations.

Civil Society Support (EUR 3.1 million)	31% (2011 only)
Education programme (EUR 2.4 million)	24% (2011 only)
Public administration capacity building (EUR 4.5 million)	45% (2011 only)

## 6. TAIEX events, SIGMA operations and twinning projects with ENP partner countries

### **Breakdown of TAIEX requests from ENP partner countries and the Russian Federation**

#### **Technical Assistance and Information Exchange (TAIEX)**

TAIEX was introduced to the ENPI region in 2006 to offer short-term assistance and advice to Partner Countries as they implement their ENP Action Plans. It was initially set up in 1996 to provide short-term, targeted technical assistance to the candidate countries. It supports Neighbouring countries in the approximation, application and enforcement of EU legislation. It is mainly demand driven, channels requests for assistance, and contributes to the delivery of appropriate tailor-made expertise to address problems at short notice. Assistance is given through expert missions, workshops or seminars and study visits.

## SIGMA

### Support for Improvement in Governance and Management (SIGMA)

SIGMA, a joint initiative of OECD (Organisation for Economic Cooperation and Development) and the EU, was founded in 1992. Principally financed by the EU, it focuses on strengthening public management in areas such as administrative reform, public procurement, public sector ethics, anti-corruption, and external and internal financial control. On a demand-driven basis, it has been assisting countries in installing governance and administrative systems appropriate to a market economy, functioning under the rule of law in a democratic context.

## Twinning projects

### Twinning

Twinning is a joint implementation tool of cooperation between Public Administrations of a EU Member State and of a Beneficiary Country. Twinning is used to support the efforts of neighbour countries to harmonise their regulations with EU legislation. Twinning aims at modernising the institution of the Beneficiary Country through training, reorganisation as well as drafting of laws and regulations modelled after the EU *acquis*. It should be related to the domains of co-operation foreseen by the Action Plan of the European Neighbourhood Policy. It consists of sending to the Beneficiary Country at least one resident adviser and a number of medium and short-term missions, all to be carried out by public officials of the EU Member State institution.
